

simplify planning and communication processes

efficient presentation of innovations

enhance customer support

download video (5MB)

- **product presentation for fairs and customer service**
Computer visualizations impressive represent innovational energy and High-Tec.
- **enhancing of communication during the planning and construction phase**
The visualizations help reduce planning costs and evaluating the planning and design decisions.
- **staff and customer training**
Computer simulations of plants and processes are a very cost-effective and concrete teaching and qualifying equipment.

BENEFITS

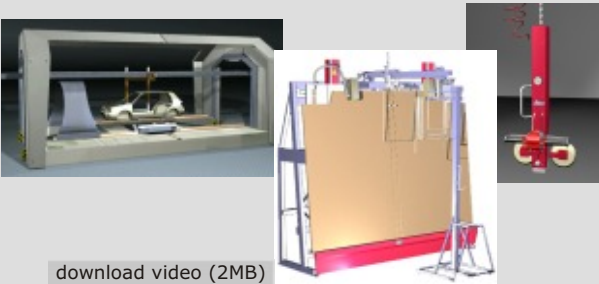

- model creation based on your 2D or 3D data, plots, sketches or photos
- professional import of custom CAD data (Catia, AutoDesk Inventor, Microstation, ...)
- animation of machine functions
- highlighting of focused product features with special computer effects
- output of the completed computer scenes as a digital photo, video, paper print or interactive
