

Scan your slides!

- Inexpensive scanning service with professional technology to digitalize 35mm color slides and negative films.
- Your existing photo collection can be saved and archived on computer data media. Dust and scratches are being removed automatically during the scanning process.
- You can treat the scanned pictures on the computer, send them by email or use them to design your own pages - there's enough resolution for color printouts up to A3 size!
- Or you create your own slide shows on CD and play them with a VideoCD or DVD player on any TV set - if you don't want to set up the slide projector and screen...

prices (incl. 16% VAT)

scanning...

- 1 picture up to 1500 dpi (ca. 2064x1421 pixel) ... 0,35 €

Prices are negociable depending the quantity of pictures.

- Film formats and types:
Negative and positive film strips (35 mm), or in mounted slides (5x5 cm).
Any stickers on the films need to be removed.
- Filtering of dust and scratches:
Based on the ICE technology, traces of dust and scratches are being reduced right in the machine while scanning. This feature is included in the price. Important note: the ICE technology does not work with monochrome or Kodachrome films.
- Negatives:
Scanning negatives results directly in ready-made positives. No further steps are necessary.
- Technical data:
optical resolution: up to 3600 dpi
color depth: up to 48 Bit
dynamic range: 3.6 Dmax
